

Practical Money Skills for Life Summer Vacation Survey

A quarter of those surveyed typically spend over \$1000 but no more than \$2500 on their summer vacation. A fifth spends over \$500 but no more than \$1000, and a fifth spend \$500 or less. For every ten people there are one and a half that typically do not take summer vacations. About one in ten paid over \$2500 but no more than \$5000, and four percent spend over \$5000 on their summer vacation.

How much do you typically spend on all aspects of your summer vacation?

Men report spending more on their vacations than women with 44 percent of men spending over \$1000 compared to 36 percent of women. Also men are more likely to take a vacation (13% no vacation) than women (16% no vacation).

How much do you typically spend on all aspects of your summer vacation?

There appears to be a strong correlation between education and the amount spent on summer vacations, as well as taking a summer vacation. Those with higher levels of education tend to spend more while those with lower levels tend to spend less or not take a vacation.
